Connecting to the LUCAS CASES folder on the network

Created: Jul 13, 2021 - 10:39AM by Baumgart, Larry

A new network drive/folder, "**I:lucascases\LUCAS Cases**" has been created, and access shared to all MEMS and Flight field staff, WHEN THEY LOG IN AS THEMSELVES TO A COMPUTER, <u>NOT</u> AS A GENERIC USER

- your individual logon is the same as your email name / password, for example, user: lbaumgart, pass: xxxxxxxx (did you really think I'd have my password here? :)

- Bill will be pointing LifeNet at this folder as the export destination for case files.

- If you do **NOT** see the folder in windows explorer:

· RIGHT Click on "THIS PC"

· choose MAP NETWORK DRIVE

· in folder, type \\mfsrvfpsa03\lucascases

· click FINISH

PCR, ePCR, Lucas, Cases, lucascases, network, map, mapping, LifeNet, Life Net
